SUGAR

Willet & Gray's Sugar Journal for January 31 reports as follows on the raw sugar market:

Our review of the week is not of special importance in respect to change in established values of Cuba centrifugals, the closing being at same price as the opening and the business being fairly large on this basis, say 2-1-8c, c. and f., for 96 test, equal to 3.45c. per pound duty paid.

Porto Rico centrifugals were also sold at 3.45c. landed.

The notable feature of the week is the change of front in the European beet sugar markets.

After having held extremely firm and steady for the long time during which Cuba has been declining, the foreign markets suddenly developed weakness, and declined from 8s. 9-3-4d. to 8s. 7-1-2d. for beet sugar and declined 3d. for cane sugar.

The immediate cause of the weakness in Europe is that French brokers came into the market as sellers and also rumors of a possible increase of sowings for the next beet crop.

The difference in the parity of beet and cane centrifugals is now reduced to 32c. per 100 pounds, the quotation for beet being equal to 3.80c. for centrifugals.

Cuba crop progresses, with 179 centrals now working, which is within four of the highest expected to grind this season. Receipts for the week, 61,000 tons, broke all previous records of crop making in any year.

In Cuba, for some time, the weather has continued fine, most of planters have had a sufficient supply of laborers and no important political disturbance has been reported, thus favoring the harvesting of the crop; these satisfactory conditions are unchanged, according to a cable message we received today from our regular Havana correspondent.

Total visible crop to date is 313,800 tons, against 96,032 tons at same time last year.

The stock in U. S. and Cuba together amount to 278,231 tons against 246,242 tons last week and 181,457 tons last year. The stock in the island or its equivalent is oversold already for shipment. When accumulations begin unless the European markets come stronger, there is a possibility of further small decline under pressure to sell up to about April, after which time a rising market may be looked for.

New Orleans refiners have recently bought February Cubas at 2-3-18c, c. and f., and Porto Ricos at 3.55c. landed. Planters in some parts of Porto Rico complain of unsatisfactory yields due to continued dry weather.

At the close, holders in Cuba show less confidence and are offering freely at 2-1-8c, c. and f., for late February and early March shipment, but the best bid is 2-1-16c, c. and f., for a limited quantity only, while the American and Howell are entirely withdrawn as buyers.
